

SOUTH BAY IT SOLUTIONS

DVBE Certified #2049778 | IT Services & Consulting

Service-Disabled Veteran-Owned Small Business (SDVOSB) | CA Certified SB/DVBE

COMPANY OVERVIEW

South Bay IT Solutions is a Chula Vista-based technology firm that helps businesses and government agencies get the most out of their technology. We specialize in **practical IT solutions**—whether that means setting up a reliable network, building a website, digitizing a warehouse of paper records, or simply making sure your systems run smoothly day to day.

As a DVBE-certified small business, we pride ourselves on personal, hands-on service. We handle everything from hardware procurement and office setup to web development, DNS configuration, and SSL certificates—so you can focus on your work, not your tech.

CORE COMPETENCIES

- **Web Design & Development:** Custom websites, landing pages, and web applications built for accessibility and performance. We handle domain registration, DNS setup, SSL certificates, hosting, and ongoing maintenance.
- **IT Procurement & Hardware Setup:** We source workstations, laptops, and peripherals at competitive pricing, then image, configure, asset-tag, and deploy them ready to use on day one.
- **Document Digitization & Records Management:** High-volume scanning of paper records into organized, searchable digital formats. File cleanup, PDF remediation, and secure archival solutions.
- **Network & Infrastructure:** WiFi, routers, switches, cabling—designed, installed, and maintained. We keep your connectivity fast, reliable, and secure.
- **Technical Support & Maintenance:** Help desk support, security patching, hardware repairs, printer setup, and day-to-day troubleshooting for businesses and agencies.
- **IT Consulting:** Technology audits, system planning, and honest guidance to help you make smart decisions—without the jargon or upselling.

WHY WORK WITH US

- **Veteran-Owned & Dependable:** We bring discipline and accountability to every project. When we commit to a deadline, we meet it.
- **Local & Responsive:** Based in Chula Vista, we provide fast, on-site support throughout the South Bay and San Diego County—something national contractors can't offer.
- **We Speak Your Language:** Technology can be confusing. We explain things clearly, in plain English, so you always know what's happening and why.
- **Small Business, Big Capability:** You get a dedicated partner who knows your setup inside and out—not a rotating cast of support tickets.
